**Subject:** MFV Tacoma model For Sale

Hello Ross

I am writing to ask if you can assist me to sell my model of the MFV Tacoma. There are various photographs on the website to show where I am up to with the model. Progress is slow, as I now work away from home and have decided to try and sell her to ease life's congestions.

As you can see, the hard work is done and I'm trying to detail her now - along with everything else I am doing.

She is plank on frame and a motor has been installed. She is also sealed in glass for the water. The deck is individually laid.

You may know someone who is looking for a project etc that has more time than me. I intend to keep plodding along but if someone was interested in finishing her - that would be good. At this size, she would also look good in a building.

I'm hopeful someone interested in the vessel may be interested in completing the project. I can be contacted at the phone and email addresses below.

Best regards

**Mark Richards**
